

# Ecological Continuum in the Alps

---

# Catalogue of measures

The catalogue of measures is designed as a tool for the pilot regions:

- Listing measures to improve ecological connectivity
- Giving an overview about all different sectors
- Ideas, examples,...
- Contacts, resources, bibliography

# Catalogue of measures

Measures in all different sectors :

- **General guidelines of measures for the alpine space**
- **Protected Areas: extension, special contractual measures, new creations**
- **Agriculture and forestry: agro-environmental measures**
- **Physical planning and infrastructure: local and based on impact studies**
- **All adapted to the local situation and in cooperation with the stakeholders and politically responsible persons**

# Catalogue of measures

---

**The aim of this catalogue is not only to elaborate a tool that can be used all over the Alps but also to evaluate the measures on their ecological efficiency and their economic feasibility!**

# Example

---

## Species rich meadow

- **Measure of the Regional Nature Park Massif des Bauges**
- **Financial support for farmers**
- **Responsibility of farmers, new role and power of protected areas staff, sensitize on environmental issues**

**Evaluation: diversity of plants and animals, very high acceptance from farmers side**

# Example

---

## **Nature friendly ski mountaineering** **(Skibergsteigen Umweltfreundlich)**

- **Measure promoted by the DAV (Deutscher Alpenverein)**
- **Work with local actors**
- **Awareness raising**

**Evaluation: in general good acceptance, integration in a wider awareness raising programme**

# Perspective

---

- **Flexible tool that can constantly be improved, completed and reviewed**
- **Can be adapted to each pilot region**
- **Can easily be developed following the needs in pilot regions (evaluation, ...)**

Thank you for your attention!
